Ticket Summary

Ticket ID: CUF-2026-101

Client Type: Home User

Status: Resolved

Issue Category

Account Lockout & Password Reset

Issue Summary

Elderly client locked out of Microsoft 365 account after multiple failed password attempts.

Environment

Client Environment: Windows 11 laptop, Microsoft 365 Personal, Outlook desktop app.

Tools used:

My Home Lab Reference:

Steps Taken (Incident Response Process)

1. Verified identity
2. Used admin recovery tools to unlock account
3. Guided client through secure password reset with password manager recommendation
4. Enabled multi-factor authentication (MFA)

Challenges & Solutions

Challenge: Client had poor password recall and anxiety about technology.

Solution: Used screensharing for step-by-step guidance with calm, patient explanations.

Outcome

The client successfully regained access and felt confident using MFA. No further lockouts reported.

SOC-Relevant Lessons Learned

Account lockouts are often early indicators of brute-force attempts; always enforce MFA and monitor for suspicious login patterns.
