Ticket Summary

Ticket ID: CUF-2026-102

Client Type: Business

Status: Resolved

Issue Category

Slow Computer Performance

Issue Summary

Small business owner reported laptop running extremely slow, affecting daily operations.

Environment

Client Environment: Windows 11 Pro, Google Chrome with 40+ tabs, multiple business applications.

Tools used:

My Home Lab Reference:

Steps Taken (Incident Response Process)

1. Ran full malware scan
2. Cleaned temporary files and browser cache
3. Disabled unnecessary startup programs
4. Updated Windows and drivers

Challenges & Solutions

Challenge: High disk usage from bloatware.

Solution: Used built-in tools + recommended lightweight antivirus.

Outcome

System performance improved by ~70%. Client enrolled in ongoing monitoring service.

SOC-Relevant Lessons Learned

Poor performance is frequently caused by undetected malware or resource abuse — early endpoint monitoring can catch these issues.
